Dear George:

As we discussed during your visit, in order to avoid interrupting the production cycle on System Two equipment, it is highly desirable that we place orders promptly for long lead time items. Based on our present schedule estimates, we should have materials for an additional quantity of System Two production available no later than June 10th, to keep the production activity operating on a continuous basis. To meet this timing and based on your verbal authorization, we have placed orders during the week of April 16th, for eight week and longer lead time items. Such orders were placed for seven (7) additional ground-based systems and eighteen (18) additional airborne systems. The following is a list of the items so ordered and an estimate of their cost:

Eight Week Lead Time Items
